Preface to the third edition *vii*

Preface to the second edition *ix*

From the preface to the first edition *xi*

Notations *xiii*

I From massless to massive neutrinos *1*

1 Introduction *3*

1.1 History . . . 3
1.2 Four-Fermi interaction . . . 5
1.2.1 Modern form of four-Fermi interaction . . . 5
1.2.2 Fierz transformation . . . 8
1.2.3 Problems with the four-Fermi interaction . . . 11
1.3 Symmetries and forces . . . 11
1.3.1 Global symmetries . . . 12
1.3.2 Local symmetries . . . 13
1.3.3 Spontaneous breaking of symmetries . . . 15
1.4 Renormalizability and anomalies . . . 19

2 The standard model and the neutrino *21*

2.1 Gauge interactions in the standard model . . . 22
2.2 Neutral current interactions of neutrinos . . . 26
2.3 Neutrino-electron scattering in the standard model . . . 29
2.3.1 $\nu_e e$ and $\widehat{\nu}_e e$ scattering . . . 29
2.3.2 $\nu_\mu e$ and $\widehat{\nu}_\mu e$ scattering . . . 33
2.3.3 Neutrino pair production . . . 34
2.4 Neutrino-nucleon scattering in the standard model . . . 35
2.4.1 Quasi-elastic $\nu_e N$ and $\widehat{\nu}_e N$ scattering . . . 35

2.4.2 Deep inelastic scattering of neutrinos off nucleons 36
2.5 Neutrino mass in the standard model 39

3 Massive neutrinos 42
3.1 Introduction 42
3.2 Theoretical motivations for neutrino mass 43
3.3 Questions related to neutrino mass 44
3.4 Tests of neutrino mass 46
3.4.1 Kinematic tests 46
3.4.2 Exclusive tests 47
3.5 Evidences of neutrino mass 49

4 Dirac versus Majorana masses 51
4.1 Two-component spinor field 51
4.2 Mathematical definition of a Majorana field 54
4.3 Different representations of Dirac matrices 57
4.3.1 Dirac representation 58
4.3.2 Majorana representation 59
4.3.3 Other representations 60
4.4 Majorana neutrinos and discrete symmetries of space-time . . . 61
4.4.1 Properties under $\mathcal{C}$ 61
4.4.2 Properties under $\mathcal{CP}$ 63
4.4.3 Properties under $\mathcal{CPT}$ 64
4.5 Majorana basis of mass terms 66
4.6 The two-component basis in a different notation 69
4.7 Feynman rules involving Majorana neutrinos 73
4.8 Diagonalization of fermion mass matrices 75

5 Neutrino oscillations 78
5.1 Theory of neutrino oscillations 78
5.1.1 Oscillation formula for mono-energetic neutrinos 79
5.1.2 Oscillation formula for three flavors 81
5.1.3 More sophisticated derivations 83
5.2 Experimental searches 85
5.2.1 Basic strategies 85
5.2.2 Effect of energy spread 87
5.2.3 Results 89
5.3 Atmospheric neutrinos 92
5.4 Oscillation with unstable neutrinos 94
5.5 Neutrino oscillations in matter 96
5.5.1 Uniform matter background 96
5.5.2 Non-uniform matter background and resonant oscillation 101

6 Solar neutrinos ***107***
6.1 Source of neutrinos in the sun 108
6.2 Solar neutrino detection techniques 110
6.2.1 Radiochemical detection 111
6.2.2 Water Čerenkov detection 112
6.2.3 Heavy water detection 114
6.3 History of solar neutrino detection 115
6.3.1 The solar neutrino puzzle 115
6.3.2 Reflections on the puzzle 116
6.3.3 New light on the puzzle 118
6.4 Solar neutrino flux and neutrino oscillations 119
6.4.1 Vacuum oscillations 119
6.4.2 Resonant oscillation in solar matter 120
6.5 Other factors that might affect solar neutrino flux 127
6.5.1 Neutrino decay 127
6.5.2 Neutrino magnetic moment 127
6.5.3 Violation of the equivalence principle for neutrinos . . . 130
6.6 Implications and outlook 132

II Models of neutrino mass ***135***

7 Neutrino mass in $SU(2)_L \times U(1)_Y$ models ***137***
7.1 Introduction 137
7.2 Models with enlarged fermion sector 138
7.2.1 A simple model with Dirac neutrinos 139
7.2.2 Neutrino mixing 140
7.2.3 Shortcomings of the model 140
7.2.4 The complete model with right handed neutrinos 141
7.3 Models with expanded Higgs sector 144
7.3.1 Adding a triplet $\boldsymbol{\Delta}$ 146
7.3.2 Model with a singly charged singlet 148
7.3.3 Model with doubly charged singlet 151
7.4 The method of flavor diagrams 152
7.5 Models with spontaneous $\boldsymbol{B-L}$ violation 154
7.5.1 Constraints on Majoron models 155
7.5.2 Majoron in the model with right-handed neutrinos . . . 157
7.5.3 Majorons in models with extended Higgs sector 159

8 Neutrino mass in Left-Right symmetric models ***163***
8.1 The gauge sector 164
8.1.1 Symmetry breaking 164
8.1.2 Constraints on the masses of the gauge bosons 170

8.2 Majorana neutrinos 172
8.2.1 The see-saw mechanism 172
8.2.2 Implications of TeV scale W_R models for leptons 174
8.3 Physics involving right-handed neutrinos 176
8.3.1 Flavor changing neutral currents 177
8.3.2 Decay of the right-handed neutrinos 178
8.4 Naturalness of the see-saw formula 180
8.5 Dirac neutrinos 183

9 Neutrino mass in Grand unified models 186
9.1 SU(5) 187
9.2 Neutrino masses in $SU(5)$ model 190
9.3 SO(10) 191
9.4 Neutrino mass in $SO(10)$ models 195
9.5 Predictive $SO(10)$ scenarios for neutrino masses 201
9.6 Neutrino masses in E_6 204

10 Neutrino mass in supersymmetric models 208
10.1 Introduction 208
10.2 The Lagrangian for supersymmetric field theories 210
10.3 Soft breaking of supersymmetry 212
10.4 Supersymmetric standard model 214
10.5 Neutrino mass in MSSM 217
10.6 Supersymmetric Left-Right model 220

11 Large neutrino mixings 222
11.1 Introduction 222
11.2 Hints for understanding large mixings 223
11.3 Mass matrices for neutrinos 224
11.3.1 Diagonalization of the neutrino mass matrix 224
11.3.2 Example of the Zee model 227
11.3.3 Patterns for mass matrices 229
11.4 Symmetries and neutrino mass textures 232
11.4.1 Two generation example with a discrete symmetry . . . 232
11.4.2 Three generation case with continuous symmetries . . . 233
11.4.3 Maximal mixing matrix 234
11.5 Radiative corrections and large mixings 236
11.6 Sum-rules and large mixings 238

III Implications of neutrino mass 241

12 Kinematic tests of neutrino mass 243

12.1 Beta decay and the mass of the $\boldsymbol{\nu_e}$ 243
12.1.1 The electron spectrum 244
12.1.2 Discussion of experimental efforts 247
12.1.3 Effect of neutrino mixing 250
12.2 Pion decay and the mass of the $\boldsymbol{\nu_\mu}$ 251
12.3 Tau decay and the mass of the $\boldsymbol{\nu_\tau}$ 253
12.4 The confusion theorem 253

13 Electromagnetic properties of neutrinos 257
13.1 Electromagnetic form factors of a neutrino 257
13.1.1 Form factors of a Dirac neutrino 258
13.1.2 Form factors of a Majorana neutrino 260
13.1.3 Form factors for a Weyl neutrino 262
13.2 Kinematics of radiative decays 263
13.3 Model calculations of dipole moments and radiative lifetime . . 264
13.3.1 $\boldsymbol{SU(2)_L \times U(1)_Y}$ model with Dirac neutrinos 265
13.3.2 $\boldsymbol{SU(2)_L \times U(1)_Y}$ models with Majorana neutrinos . . 269
13.3.3 Left-right symmetric model 272
13.4 Large magnetic moment and small neutrino mass 275

14 Double beta decay 281
14.1 Introduction 281
14.2 Kinematical properties 283
14.3 Neutrinoless double beta decay in $\boldsymbol{SU(2)_L \times U(1)_Y}$ models . 287
14.3.1 Light Majorana neutrino exchange 288
14.3.2 Heavy Majorana neutrino exchange 291
14.3.3 Exchange of doubly charged Higgs boson 291
14.4 Neutrinoless double beta decay in Left-Right models 292
14.4.1 Light neutrino exchange 293
14.4.2 Heavy Majorana neutrino exchange 293
14.4.3 Heavy-light neutrino mixing 294
14.4.4 Higgs exchange contribution 295
14.5 Neutrinoless double beta decay in supersymmetric models . . . 296
14.6 Majoron emission in $\beta\beta_{0\nu}$ decay 298
14.7 Neutrino mass and $\beta\beta_{0\nu}$ decay 299

15 Related processes 303
15.1 Lepton flavor changing processes 303
15.1.1 Radiative decays of muon and tau 303
15.1.2 Decays of μ and τ into charged leptons 306
15.1.3 Muonium-antimuonium transition 309
15.1.4 Semi-leptonic processes 311
15.2 CP-violation in the leptonic sector 312

15.2.1 CP-violating phases in the fermion mass matrix 313
15.2.2 Rephasing invariants 315
15.2.3 CP violation in the light neutrino sector 316
15.2.4 Electric dipole moment of the electron 318

16 Neutrino properties in material media ***322***
16.1 Dispersion relation of neutrinos in a medium 323
16.1.1 The general structure 323
16.1.2 Propagators in a thermal medium 325
16.1.3 Calculation of the dispersion relation of neutrinos 327
16.2 Electromagnetic properties of neutrinos in a medium 329
16.2.1 General considerations 329
16.2.2 Calculation of the vertex in a background of electrons . 332
16.2.3 Induced electric charge of neutrinos 335
16.2.4 Radiative neutrino decay in a medium 336
16.3 Other effects 338

17 Neutrinos from supernovae ***340***
17.1 Qualitative picture of supernova collapse 340
17.2 Flux of supernova neutrinos 342
17.3 Neutrino properties implied by SN1987A observations 345
17.3.1 Neutrino mass 346
17.3.2 Neutrino lifetime 347
17.3.3 Magnetic moment of the neutrino 347
17.3.4 Electric charge of neutrino 351
17.3.5 Strength of right-handed weak interactions 352
17.3.6 Radiative decay of neutrinos 352
17.3.7 Bounds on Majoronic decay modes 354
17.3.8 Bound on neutrino mixings 355
17.3.9 Test of weak equivalence principle for neutrinos 356
17.4 Inferring neutrino spectrum from nearby supernovae 357

18 Neutrino cosmology ***359***
18.1 The Big Bang model 359
18.1.1 Cosmological evolution 359
18.1.2 Early universe 364
18.2 Neutrino decoupling 366
18.3 Nucleosynthesis and the number of neutrino species 368
18.4 Constraints on stable neutrino properties 371
18.4.1 Bound on the degeneracy of massless neutrinos 372
18.4.2 Bound on light neutrino masses 372
18.4.3 Bound on degenerate light neutrinos 374
18.4.4 Bound on heavy stable neutrino masses 375

18.5 Constraints on heavy unstable neutrinos 380
18.6 Limits for radiative neutrino decays 382
18.7 Limits on neutrino properties from nucleosynthesis 386
18.7.1 Limit on interaction of right-handed neutrinos 386
18.7.2 Neutrino mass 387
18.7.3 Neutrino magnetic moment 388
18.8 Neutrinos and dark matter in the universe 389
18.8.1 Galactic halos and neutrinos 389
18.8.2 Galaxy formation and neutrinos 393
18.9 Leptogenesis and baryogenesis 395
18.9.1 Connection between baryogenesis and neutrinos 395
18.9.2 Details of the right handed neutrino decay mechanism . 398

19 Sterile neutrinos ***402***
19.1 Results from the LSND experiment 403
19.2 Theoretical implications 403
19.3 Cosmological constraints 404
19.4 Understanding the sterile neutrino 406
19.5 Conclusion 409

IV Appendices ***411***

References ***413***

Index ***445***
