

**INNER SHELL IONISATION
AND SCATTERING
BY PHOTONS AND CHARGED PARTICLES**

THESIS SUBMITTED
FOR THE DEGREE OF DOCTOR OF PHILOSOPHY (SCIENCE)
OF
JADAVPUR UNIVERSITY

ATIS CHANDRA MANDAL
SAHA INSTITUTE OF NUCLEAR PHYSICS
1/AF, BIDHANNAGAR
KOLKATA- 700 064
2005

CONTENTS

Chapter 1 Introduction	1
Bibliography	5
Chapter 2 Theoretical Background	7
2.1 Inner shell ionization and subsequent processes	7
2.1.1 Introduction	7
2.1.2 Fluorescence, Auger and Coster-Kronig yields	10
2.1.3 Fractional x-ray emission rates	12
2.2 Inner shell ionization by charged particles	13
2.2.1 Introduction	13
2.2.2 Direct Ionization (DI)	14
2.2.2.1 Binary Encounter Approximation (BEA)	14
2.2.2.2 Semi Classical Approximation (SCA)	15
2.2.2.3 Plane Wave Born Approximation (PWBA)	16
2.2.2.4 Modified PWBA theory or the ECPSSR formalism	18
2.2.2.5 United Atom (UA) modification	21
2.2.2.6 Two step model of DI	22
2.2.3 Molecular orbital promotion	22
2.3 Inner shell ionization by photons	23
2.3.1 Introduction	23
2.3.2 Interaction of photons with the Coulomb field	23
2.3.3 Central Potential Model	26
2.4 Elastic scattering of photons	27
2.4.1 Introduction	27
2.4.2 The Rayleigh scattering (coherent scattering)	29
Bibliography	32

Chapter 3 Instrumentation and some important expressions	36
3.1 X-ray source with its experimental setup	36
3.1.1 X-ray source	36
3.1.2 Experimental setup	38
3.2 Heavy ion machine with its experimental setup	39
3.2.1 Heavy ion machine	39
3.2.2 Experimental setup	41
3.3 Target preparation	42
3.4 X-ray Detector and Electronics	43
3.5 Surface Barrier Detector	46
3.6 Pulse Processing Units	47
3.7 The Multichannel Analyzer (MCA)	48
3.8 Theoretical efficiency curve for Si(Li)/HPGe detector	49
3.9 Expression used to calculate the x-ray fluorescence cross sections in photoionization	50
3.10 Expression used to calculate the x-ray production cross sections in ion atom collision	53
3.11 Relation between x-ray production and ionization cross sections	54
Bibliography	56
Chapter 4 L sub shell ionization of Ce, Nd and Lu by 4 – 10 MeV carbon ions	57
4.1 Introduction	57
4.2 Experiment	59
4.3 Analysis	59
4.3.1 Determination of $L_{\gamma 2+3}$ for Lu using a revised Datz technique	64
4.3.2 Effect of different choice for single-hole atomic parameters on the extracted ionization cross sections	66
4.3.3 Multiple ionization effects	70
4.4 Comparison of the extracted L sub shell ionization cross sections with theories	80
4.5 Conclusion	91
Bibliography	93

Chapter 5 Inner shell ionization and elastic scattering by photons	98
5.1 Measurement of photon induced L shell fluorescence cross sections of gold and lead at 21.6, 23.7 and 25.8 keV	98
5.1.1 Introduction	98
5.1.2 Experiment	99
5.1.3 Analysis	102
5.1.4 Results and Discussions	108
5.1.5 Conclusion	110
5.2 L x-ray fluorescence cross sections of some rare earth elements ($Z = 62, 64, 66, 68$ and 70) at 17.8, 22.6 and 25.8 keV	111
5.2.1 Introduction	111
5.2.2 Experiment	113
5.2.3 Analysis	114
5.2.4 Results and Discussions	119
5.2.5 Conclusion	126
5.3 Differential elastic scattering cross sections of 22.1 keV x-rays by elements in the range $22 \leq Z \leq 82$	127
5.3.1 Introduction	127
5.3.2 Experiment	129
5.3.3 Analysis	131
5.3.4 Results and Discussions	135
5.3.5 Conclusion	143
Bibliography	143
Chapter 6 Some applications related to EDXRF technique	147
6.1 Introduction	147
6.2 A simple EDXRF technique to analyse alloys	148
6.2.1 Introduction	148
6.2.2 Principle	149
6.2.3 Experiment	151
6.2.4 Results and Discussions	153

6.2.5 Conclusion	155
6.3 EDXRF as a routine tool for numismatic studies	156
6.3.1 Introduction	156
6.3.2 Experiment	156
6.3.3 Results and Discussions	158
6.3.4 Conclusion	160
6.4 Numismatic study of Malhar coins by EDXRF technique	161
6.4.1 Introduction	161
6.4.2 Experiment	162
6.4.3 Results and Discussions	164
6.4.4 Conclusion	169
6.5 Bremsstrahlung excited standardless EDXRF analysis	171
6.5.1 Introduction	171
6.5.2 Experiment	172
6.5.3 Fitting of the bremsstrahlung spectrum	176
6.5.4 Concentration calculation	181
6.5.5 Results and Discussions	182
6.5.6 Conclusion	184
Bibliography	184
List of Publications	187
