

**SPECTROSCOPIC STUDIES OF SOME
BIOLOGICALLY IMPORTANT MOLECULES
IN DIFFERENT ENVIRONMENTS**

THESIS SUBMITTED FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY (SCIENCE)
OF THE
UNIVERSITY OF CALCUTTA

BY

JAYANTI GUHARAY

Biophysics Division
Saha Institute of Nuclear Physics
37, Belgachia Road, Calcutta 700 037

1996

CONTENTS

	<u>Page</u>
List of abbreviations	i
Summary	iii
Chapter I Introduction.	1
Chapter II Excited State Relaxation Processes in Molecules and Effects of Environments.	4
Chapter III Flavones and Related Compounds.	28
Chapter IV Novel Fluorescence Probes for Proteins : 7-azaindole, 7-azatryptophan and 5-hydroxytryptophan.	43
Chapter V Membrane Mimetic Environments.	60
Chapter VI Luminescence Studies of Model Flavonoids in Different Environments :	79
6.1. Materials and methods.	83
6.2. Luminescence behaviour of model flavonoids in reverse micelles.	87
6.3. Luminescence behaviour of model flavonoids in liposomal environments.	98
6.4. Luminescence behaviour of naturally occurring flavonoids in different environments.	107
6.5. Low temperature luminescence behaviour of 7-hydroxyflavone.	134
Chapter VII Luminescence Studies of 7-azaindole, 7-azatryptophan and 5-hydroxytryptophan :	140
7.1. Materials and methods.	141
7.2. 7-azaindole in reverse micelles.	143
7.3. 7-azatryptophan in reverse micelles.	154
7.4. 5-hydroxytryptophan in reverse micelles.	163
7.5. Low temperature luminescence behaviour of tryptophan derivatives.	171
Chapter VIII Conclusions.	178
