

**SPECTROSCOPIC STUDIES OF SOME  
BIOLOGICALLY IMPORTANT MOLECULES**

**THESIS SUBMITTED FOR THE DEGREE OF  
DOCTOR OF PHILOSOPHY (SCIENCE)  
OF THE  
UNIVERSITY OF CALCUTTA**

**BY**

*Munna Sarkar*

**1992**

# CONTENTS

	PAGE	
Preface	<i>i</i>	
Summary	<i>iii</i>	
Chapter I	Introduction	1
Chapter II	Excited State Relaxation Processes in Molecular Systems	5
	2.1. Excited state proton transfer (ESPT)	7
	2.2. Solvent dipolar relaxation	20
	2.3. Excimer and exciplex formation	28
	2.4. Local geometric conformational change	33
Chapter III	Flavones and Related Compounds	36
Chapter IV	Solvent Relaxation in 7-Hydroxyflavone	49
Chapter V	Photophysical Properties of Flavones and Related Compounds in Different Environments	74
	5.1. Influence of organized assemblies like micelles and reverse micelles on the excited state proton transfer (ESPT) of 3-hydroxyflavone and 2-methyl 3-hydroxychromone	79
	5.2. Luminescence behaviour of 7-hydroxyflavone in different homogeneous media and organized assemblies like micelles and reverse micelles	103
Chapter VI	Interaction of 3-Hydroxyflavone and 7-Hydroxyflavone with Indole and N-acetyl tryptophanamide	129
Chapter VII	Conclusion	146
