

Studies of tertiary amine local anesthetics in phospholipid membranes and in membrane-mimetic systems

Thesis Submitted for The Degree of
Doctor of Philosophy (Science)
of
Jadavpur University
November 2002

By
Mousumi Mondal

Chemical Sciences Division
Saha Institute of Nuclear Physics
1/AF Bidhannagar, Kolkata, 700064
INDIA

Contents

Chapter	Page Number
Preface	I
Abbreviations	II
Chapter 1 Anesthetic Drugs and Biomembrane	1-17
Chapter 2 Experimental Methods and Analysis of Data	18-30
Chapter 3 Photophysical studies of local anesthetics in reverse micelles and in different solvents	31-45
Chapter 4 Effect of cholesterol on interaction of dibucaine and tetracaine with phospholipid vesicles	46-62
Chapter 5 Effect of GM1 on the localization of dibucaine and tetracaine in phospholipid vesicles	63-78
Chapter 6 Interaction of the tertiary amine local anesthetics with a membrane skeletal protein, spectrin.	79-93
Concluding Remarks	94-95
References	96-114
Publications	115
