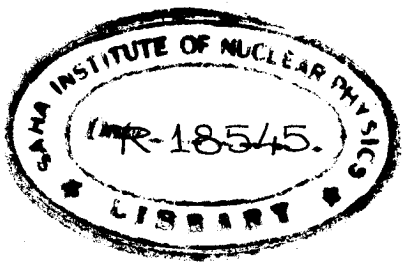
NUCLEAR MAGNETIC RESONANCE IN PARAMAGNETICS



Thesis Submitted for the Degree of
Doctor of Philosophy (Science)
of the
University of Calcutta

By

MANORANJAN BHATTACHARYYA, M. Sc.

SAHA INSTITUTE OF NUCLEAR PHYSICS

CALCUTTA-9.

JANUARY, 1972.

CONTENTS

	Page
CHAPTER 1 : INTRODUCTION	1
1.1 Nuclear Magnetism	2
1.2 Nuclear Magnetic Resonance	3
1.2.1 Spin Lattice Relaxation	4
1.2.2 Local Field	5
1.2.3 Transverse Relaxation	6
1.3 NMR in Non-Magnetic Systems	6
1.3.1 Electron Nuclear Coupling in Diamagnetic Substance	7
1.4 NMR in Magnetic Systems	9
1.5 NMR in Paramagnetics	12
1.6 Conditions for the Observability of an NMR Signal	13
1.6.1 NMR of Nuclei in Paramagnetic Atom or Ion (Direct Hyperfine Field) ..	14
1.6.2 NMR of Nuclei in Partially Magnetic Atom (Case of Transferred Hyperfine Field)	17
1.6.3 NMR of Nuclei in Non-Magnetic Ion (Dipolar Field)	17
1.7 Scope and Objective of the Thesis ..	18
References	20

CHAPTER 2 : MAGNETIC HYPERFINE INTERACTIONS .. 25

2.1 Hyperfine Interaction Hamiltonian .. 26

2.1.1 Hyperfine Field and Hyperfine Coupling Constant 29

2.1.2 Isotropic and Anisotropic Parts of Hyperfine Coupling 30

2.1.3 Transition Probability for Nuclear and Electronic Spins on the same Atom .. 33

2.2 Nuclear Hamiltonian .. 35

2.2.1 Hyperfine Coupling Constant A .. 36

2.2.2 Isotropic A 36

2.2.3 Anisotropic A 37

2.3 Fractions of Unpaired Spins .. 39

2.4 Isotropic Shifts 41

2.4.1 Contact Shift 41

2.4.2 Pseudo Contact Shift 42

2.4.2.1 Isotropic Shift in Solid .. 44

2.4.2.2 Isotropic Shift in Solution .. 47

References 49

CHAPTER 3 : EXPERIMENTAL DETAILS .. 51

3.1 Spectrometer and Magnet Assembly .. 52

3.2 Calibration Procedure 54

Page

3.2.1 Field Modulation 55

3.2.2 Frequency Modulation 56

3.2.3 Calibration in the Case of Weak Signals 56

3.3 Shift Measurement 57

3.4 Temperature Variation Work 58

3.4.1 Difficulties Encountered in Temperature Variation Work .. 59

3.4.2 Modifications 59

CHAPTER 4 : INTERACTION OF PHOSPHATE LIGAND WITH TRANSITION METAL ION .. 61

4.1 Introduction 62

4.2 Effect of Paramagnetic Ion on the Relaxation Process in Solution 63

4.3 Temperature Effect on Relaxation .. 66

4.3.1 Effect of Chemical Exchange on NMR .. 67

4.3.2 Modified Bloch Equation for the Temperature Effect 68

4.4 ^{31}P NMR Studies in Solutions of Phosphoric Acid Containing Paramagnetic Ions .. 71

4.4.1 Experimental Considerations .. 73

4.4.2 Methods of Analysis 73

4.4.3 Results and Discussion .. 76

References 82

Page

CHAPTER 5 : STUDIES ON RPO_4 SYSTEM : PHYSICAL AND CHEMICAL INVESTIGATIONS .. 85

5.1 Introduction 86

5.2 Atomic and Ionic Properties .. 87

5.2.1 Crystal Structure of Rare-Earth Compounds 92

5.2.2 Crystal Structure of RPO_4 .. 93

5.3 Present Structural Investigation on RPO_4 .. 96

5.3.1 Preparation of Samples .. 98

5.3.2 Experimental Work on RPO_4 : Physical and Chemical 102

5.3.2.1 Methods of Analysis of Rare-Earth and Phosphates 102

5.3.2.2 On the Dehydration of Phosphates .. 104

References 108

CHAPTER 6 : NUCLEAR MAGNETIC RESONANCE INVESTIGATION IN RPO_4 SYSTEMS .. 109

6.1 Role of f Electrons in Bonding .. 110

6.2 Properties of Rare-Earth Ions in Crystals .. 113

6.3 NMR in Paramagnetics 118

6.4 NMR Studies in RPO_4 Systems .. 120

6.5 Results and Discussions 123

6.5.1 Experimental Conditions .. 123

Page

6.5.2 ^{31}P Investigations on some Diamagnetic and Paramagnetic Phosphorous Compounds .. 126

6.5.3 ^{31}P NMR Studies of Hydrated vs. Anhydrous Phosphates 130

6.5.3.1 Line Widths 132

6.5.3.2 Asymmetry 137

6.5.3.3 Temperature Variation Work .. 141

6.5.3.4 Shifts 143

6.5.4 Proton Resonance in Hydrated Phosphate .. 153

6.6 Magnetic Resonance Studies of Reported Anti-ferromagnetic Transition in a no. : of Rare-Earth Phosphates 160

6.6.1 : Results, &62 Discussion .. 16f,162

References 166

CHAPTER 7 : LINE SHAPE ANALYSIS FOR ASYMMETRIC LINES 172

7.1 Line Shape 173

7.2 Fine Structure of Spectral Lines (Strongly Coupled Two Spin System) 175

7.3 Axially Symmetric Anisotropic Interaction .. 177

7.4 Different Cases of Axial Interaction .. 179

7.5 Expressions for Absorption Lines and its Derivatives 180

7.6 Method of Analysis 183

Page

7.6.1 Effect of Parameter on the Line Shape 184

7.6.2 Fitting Procedure 187

7.6.3 Sign of Parameter 191

7.6.4 Discussion on the Parameters from Computer Fitting .. 191

7.7 On the Results of Line Width, β, a_y and a_p from Computer Fittings 193

References 196
