

GROWTH AND PROPERTIES OF ULTRATHIN POLYMER FILMS

THESIS SUBMITTED TO THE
JADAVPUR UNIVERSITY
FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY (SCIENCE)

By

MISHREYEE BHATTACHARYA

SAHA INSTITUTE OF NUCLEAR PHYSICS,
KOLKATA 700 064, INDIA

Contents

Acknowledgment	iv
1 Introduction	1
1.1 Era of Polymers	2
1.2 Polymer Films	3
1.3 Present Microscopic Understanding	5
1.3.1 Polymers in solution	7
1.3.2 Polymer at surfaces and interfaces	12
1.3.3 Growth and structure of confined thin films	17
1.4 Physical Properties of Polymer Films	20
1.4.1 Thermal properties and glass transition	21
1.4.2 Molecular mobility in thin films	22
1.4.3 Instability of polymer film	24
1.5 Outline of This Thesis	24
2 Experimental Techniques	34
2.1 Deposition of Polymer Thin Films	35
2.1.1 Spin Coating Technique	35
2.1.2 Thickness Calibration Curves	35
2.2 Grazing Incidence X-ray Scattering Technique	40
2.3 Sample Cell	45
2.4 Energy Dispersive Reflectivity	46
2.4.1 EDR Beamline at BESSY-II	46

2.4.2	EDR set up using laboratory source	49
2.5	Ion Implantation	50
2.5.1	Basic Idea	50
2.5.2	Instrumentation	51
2.6	Other Techniques	54
2.6.1	Scanning Electron Microscopy (SEM)	54
2.6.2	Energy Dispersive X-ray Spectrometry (EDS)	56
2.6.3	Atomic Force Microscopy (AFM)	57
2.6.4	Secondary Ion Mass Spectrometry (SIMS)	61
3	X-ray Reflectivity Studies	67
3.1	Introduction	68
3.2	Basic Formalism	69
3.3	The Resolution Function	76
3.4	ADR and EDR Modes	78
3.5	Discussion	86
4	Thermal Expansion Studies	91
4.1	Introduction	92
4.2	Experimental Details	95
4.3	Combining ADR and EDR techniques	97
4.4	Results and Discussions	99
4.4.1	Single layer films	99
4.4.2	Bilayer films	108
5	Glass Transition Studies	116
5.1	Introduction	117
5.2	Experimental Studies	120
5.2.1	Sample preparation and characterization	120
5.2.2	Transverse x-ray diffuse scattering measurements	121
5.2.3	Thickness measurements through XRR	124

5.3	Results and Discussions	130
6	Ion Implantation in Polymer	139
6.1	Introduction	140
6.2	Sample Preparation and Characterization	141
6.3	Ion-induced Erosion Studies	142
6.4	Oxide Circle Formation	153
6.4.1	AFM studies	155
6.4.2	SEM and EDX studies	157
6.4.3	XRR measurements	159
6.4.4	SIMS and XPS measurements	160
6.4.5	Discussions	162
