

**MAGNETIC FIELD EFFECT IN PHOTOINDUCED
ELECTRON TRANSFER**

**THESIS SUBMITTED FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY (SCIENCE)
OF
JADAVPUR UNIVERSITY**

By

TAMAL SENGUPTA

Chemical Sciences Division

Saha Institute of Nuclear Physics

1/AF Bidhannagar

Chapter 1 Electron Transfer and Magnetic Field Effect in Chemistry and Biology **1-70**

1.1 Introduction	1
1.2 Theory of Electron Transfer	3
1.2.1 Classical Approach	3
1.2.2 Adiabatic and Nonadiabatic Electron Transfer	7
1.2.3 Quantum Mechanical Approach	7
1.2.4 Nuclear tunneling	9
1.2.5 The Inverted Region-Theory and Reality	10
1.2.6 Intersecting State Model	15
1.3 Exciplex and Electron Transfer	15
1.4 Rehm-Weller Analysis	18
1.5 Intramolecular Electron Transfer	20
1.5.1 A Brief Overview	20
1.5.2 Through Bond or Through Space : Which Mechanism dominates?	22

1.5.3 Superexchange and Sequential Electron Transfer	23
1.6 Electron Transfer in Biology	24
1.6.1 Introduction	24
1.6.2 Protein Electron Transfer	25
1.6.3 DNA electron Transfer	26
1.6.3.1 DNA mediated electron transfer	26
1.6.3.2 DNA Repair and Electron Transfer	27
1.6.3.3 Distance Dependence	28
1.7 Magnetic Field Effect	28
1.7.1 Introduction	28
1.7.2 Mechanisms of Magnetic Field Effect	29
1.7.2.1 The Hyperfine Coupling Mechanism	32
1.7.2.2 Level Crossing Mechanism	32
1.7.2.3 Magnetic Isotope Effect	33
1.7.2.4 The Δg Mechanism	33
1.7.2.5 Triplet Doublet quenching	34
1.7.2.6 The Triplet Mechanism	34
1.7.2.7 The Relaxation Mechanism	35
1.7.2.8 Role of Spin Orbit Coupling in Magnetic Field effect	35
1.7.3 Experimental Studies of Magnetic Field effect	36
1.7.3.1 Introduction	36
1.7.3.2 Magnetic Field effect on Exciplex Luminescence	36
1.7.3.2.1 Dielectric Dependence for Unlinked system	36
1.7.3.2.2 Magnetic Field effect on Intramolecular Exciplex	38
1.7.3.2.3 Nature of Bridge	39
1.7.3.2.4 Dielectric Dependence for the Spacer Linked Systems	39
1.7.3.2.5 Lanthanides and Magnetic Field effect	41

1.7.3.2.6	Measurement of Hyperfine-The Parameter $B_{1/2}$	41
1.7.3.2.7	Effect of Temperature	44
1.7.3.2.8	Effect of High Magnetic Field on Intramolecular Exciplex	44
1.7.3.3	Magnetic Field Effect in Heterogeneous Media	45
1.7.3.3.1	Magnetic Field Effect on Triplet RP	45
1.7.3.3.2	Magnetic Field Effect on Triplet Biradicals	47
1.7.3.3.3	Radicals with Atoms other than Carbon	50
1.7.3.4	Triplet Radical Pairs in Homogeneous Media	52
1.7.3.5	Saturation of Magnetic Field Effect	52
1.7.3.6	Supercage Effect	53
1.7.3.7	Triplet Doublet Quenching	53
1.7.3.8	Magnetic Field Effect and the Triplet Mechanism	53
1.7.3.9	Magnetic Field Effect on Picosecond electron transfer	54
1.8	Magnetic Field Effect in Biology	54
1.8.1	Introduction	54
1.8.2	Magnetic Field Effect on Enzymatic reactions	55
	<i>References</i>	57
Chapter 2	Scope of The Thesis	71-72
Chapter 3	Experimental Techniques	73-80
3.1	Measurement of Absorption	73
3.2	Measurement of Fluorescence	73

3.2.1	Steady State Measurements	73
3.2.2	Measurement of Fluorescence Lifetime	73
3.2.3	Fluorescence Anisotropy	75
3.3	Magnetic Field Effect Study With The Phase Sensitive Detection System	77
3.4	Laser Flash Photolysis	78
3.5	Materials	78
	<i>References</i>	80
 Chapter 4 Exciplex between All-s-trans-1,6-diphenylhexa-1,3,5-triene and 1,4-Dicyanobenzene: Isotropic and Anisotropic Magnetic Field Effect		 81-101
4.1	Introduction	81
4.2	Results and Discussion	83
4.2.1	Fluorescence Measurements	83
4.2.2	Isotropic Magnetic Field Effect	86
4.2.2.1	Dielectric Dependence	86
4.2.2.2	Wavelength Dependence: Stoichiometry of Exciplex	88
4.2.2.3	Measurement of $B_{1/2}$	91
4.2.3	Anisotropic Magnetic Field Effect	92
4.2.3.1	Earlier Studies: A Brief Overview	92
4.2.3.2	Results and Discussion	94
4.3	Concluding Remarks	98

Chapter 5 Exciplex between all-s-trans-1,4-diphenylbuta1,3-diene and 1,4-Dicyanobenzene: Chain Length and Magnetic Field Effect 102-110

5.1 Introduction	102
5.2 Results and Discussion	103
5.2.1 Fluorescence Measurements	103
5.2.2 Magnetic Field Effect	106
5.3 Concluding Remarks	108

References

110

Chapter 6 Exciplexes with Two Indole derivatives: A Comparative Magnetic Field Effect Study 111-123

6.1 Introduction	111
6.2 Results and Discussion	113
6.2.1 Fluorescence Measurements	113
6.2.2 Magnetic Field Effect	116
6.2.2.1 Dielectric Dependence	116
6.2.2.2 Percentage Magnetic Field Effect	117
6.2.2.3 Variation in Magnetic Field Effect and $B_{1/2}$	119
6.2.2.4 Wavelength Dependence	120
6.3 Concluding Remarks	121

**Chapter 7 Medium Dependent Electron and H Atom Transfer between
2'-Deoxyadenosine and Menadione: Laser Flash Photolysis and
Magnetic Field Effect** 124-137

7.1 Introduction	124
7.2 Results and Discussion	126
7.2.1 Ground State Absorption	126
7.2.2 Laser Flash Photolysis	126
7.2.2.1 Flash Photolysis in Acetonitrile	126
7.2.2.2 Flash photolysis in SDS	129
7.2.3 Magnetic Field Effect	132
7.3 Concluding Remarks	135

References

136

Chapter 8 Summary and Conclusion 138-140

<i>List of publications</i>	141
<i>List of abbreviations and symbols</i>	142
