

D I S S E R T A T I O N

SUBMITTED

FOR THE DEGREE OF DOCTOR OF PHILOSOPHY (SCIENCE)

OF THE UNIVERSITY OF CALCUTTA

B Y

SOBHANA DHAR, M.Sc.,

INSTITUTE OF NUCLEAR PHYSICS,

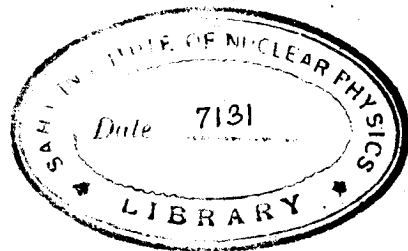

UNIVERSITY COLLEGE OF SCIENCE AND TECHNOLOGY,

CALCUTTA UNIVERSITY, CALCUTTA.

DATED THE 12TH APRIL, 1955.

DEVELOPMENT AND STUDIES ON
ENERGY RESPONSE AND RESOLUTION OF
SCINTILLATION COUNTERS
AND
THEIR APPLICATIONS IN
MEASUREMENTS OF ALPHA ACTIVITY
AND
IN GAMMA RAY SPECTROSCOPY

C O N T E N T S

PREFACE AND ACKNOWLEDGMENTS

A B S T R A C T S	-	PART I
		PART II
		PART III
		PART IV

PART I	<u>DEVELOPMENT AND APPLICATION OF SCINTILLATION COUNTER AS NUCLEAR RADIATION DETECTOR</u>	<u>PAGE</u>
1.1	Historical background	.. 2
1.2	Advantages over other detectors	.. 5
1.3	Characteristics and performance of photomultiplier tubes	.. 9
1.4	Selection of phosphors	.. 26
1.5	Luminescence process in brief	.. 33
1.6	Luminescence spectra of some phosphors	.. 35
1.7	Experimental arrangement and electronic circuits	.. 42
1.8	Selection of photomultiplier tubes	.. 47
1.9	Beta and gamma counting and discussion	.. 50
1.10	A point of experimental interest	.. 58
	REFERENCES	.. 60

PART II

LOW RATE SCINTILLATION TYPE ALPHA
COUNTER AND ITS APPLICATION TO
URANIUM AND THORIUM ESTIMATION
OF MINERALS

PAGE

2.1	Introduction	..	64
2.2	Experimental arrangement	..	66
2.3	Results with polonium source	..	70
2.4	Standardisation of the apparatus	..	70
2.5	Detection of weak alpha activity	..	74
2.6	Introduction to the determination of uranium and thorium contents in minerals	..	76
2.7	Theory	..	78
2.8	Experimental arrangement and results	..	82
2.9	Detection of fission	..	83
2.10	Discussion	..	84
	REFERENCES	..	89

Reprint entitled "Scintillation type alpha counter and its application in uranium and thorium estimation of minerals" (Ind. Jour. Phys. 24, 346, 1950).

PART III

ON THE ENERGY RESPONSE AND
RESOLUTION OF A SCINTILLATION COUNTER

3.1	Introduction	..	91
3.2	Luminescence process in	..	93
	(a) Inorganic crystals	..	94
	(b) Organic crystals and solutions	..	98
	(c) Plastic scintillators	..	103

* To be communicated shortly for publication

	<u>PAGE</u>
3.3 Response ..	105
3.4 Pulse height distribution ..	117
3.5 Pulse height resolution ..	127
3.6 Experimental arrangement:	
(a) Source ..	129
(b) Spectrometer chamber ..	130
(c) Magnet current stabiliser ..	134
(d) Recording arrangement ..	141
(e) Light collection ..	144
3.7 Behaviour of crystals in vacuum ..	146
3.8 Polishing of phosphors ..	147
3.9 Luminescence spectra of the phosphors used ..	151
3.10 Results and discussion:	
(a) Energy response ..	154
(b) Nature of the pulse height distribution ..	169
(c) Figure of merit ..	170
(d) Pulse height resolution ..	177
REFERENCES ..	183

PART IV

**THE USE OF THE SCINTILLATION COUNTER AS
A RADIATION SPECTROMETER**

4.1 Introduction ..	187
4.2 Spectrometry of gamma radiation ..	189

	<u>PAGE</u>
4.3 Previous works and results ..	192
4.4 Experimental details and results ..	193
REFERENCES ..	196

Reprint entitled "On the use of the scintillation counter as a gamma ray spectrometer using stilbene crystal" (Ind. Jour. Phys. 27, 483, 1953).
