

ASPECTS OF BLACK HOLE PHYSICS

By

AYAN CHATTERJEE

Saha Institute of Nuclear Physics , Kolkata, India

*A thesis submitted to the
Board of Studies in Physical Sciences
in partial fulfillment of requirements
for the Degree of*

DOCTOR OF PHILOSOPHY

of

HOMI BHABHA NATIONAL INSTITUTE

INDIA

January 2010

TABLE OF CONTENTS

	Page
Acknowledgments	ii
List of Figures	vii
Chapters:	
1. Synopsis of the Thesis	1
1.1 Introduction	1
1.2 Weak Isolated Horizons: The Definition	4
1.3 Weak Isolated Horizons: Applications	6
2. Introduction	10
2.1 A Bit of History	10
2.2 Astronomical Evidence for Black Holes	12
2.3 Event Horizons	12
2.4 Killing Horizons	15
2.5 Laws of Black Hole Mechanics: A Critique	17
2.6 Isolated Horizons	20
3. Geometry of Generic Null Hypersurfaces	24
3.1 Submanifolds and Hypersurfaces: Definition	24
3.2 Properties of Null Hypersurfaces	25
3.2.1 The Tangent Space on Δ	26
3.2.2 The Induced Metric on Δ	27
3.2.3 The Connection on Δ	28
3.3 The Schwarzschild Horizon: an Example	30
3.4 Discussion	33

4.	Weak Isolated Horizon & the Zeroth Law	35
4.1	Boundary Conditions for a Non-Expanding Horizon	36
4.1.1	Consequences of the Boundary Conditions	37
4.2	Weak Isolated Horizon and the Zeroth Law	38
4.3	Electromagnetic Fields on WIH	40
4.3.1	Constraint on fields from boundary conditions	40
4.3.2	Electromagnetic Zeroth Law	44
4.4	Discussions	45
5.	The Holst Action & the First Law	46
5.1	The Holst Action	46
5.2	The Variational Principle	48
5.2.1	Tetards and Connection on Δ	49
5.2.2	Variation of the Action	52
5.3	The Symplectic Structure	53
5.4	The First Law	56
5.4.1	Contribution from EM fields	59
5.4.2	First Law for Rotating WIH	60
5.5	Discussions	66
6.	The Boundary Symplectic Structure	68
6.1	Restrictions from Spherical Symmetry	68
6.2	The Boundary Symplectic Structure	70
6.3	The Symmetry Algebra on Δ	71
6.4	Discussions	72
7.	Black Holes in $\mathcal{N} = 2$ Supergravity	73
7.1	Isolated Horizon Boundary Conditions	77
7.2	Conditions from $\mathcal{N} = 2$ Pure Supergravity	78
7.3	Consequences of Boundary Conditions	82
7.4	Laws of Black Hole Mechanics and Entropy	84
7.4.1	The Zeroth Law	85
7.4.2	The First Law	85
7.4.3	Chern-Simons Theory and Entropy	90
7.5	Discussions	92

Appendices:

A.	The First Order Formalism	94
	A.0.1 The Holst Action and it's Symplectic Structure	95
	A.0.2 Canonical Hamiltonian Formulation	98
B.	The Newman-Penrose Formalism	102
C.	Calculation of Some Results used in the Text	109
	C.1 Contribution of Bulk to Symplectic Structure	109
	C.2 Spherical Symmetry and Angular Momentum	111
	C.3 Proof of $d^2\epsilon \triangleq 0$	114
	List of Publications	115
	Bibliography	116
