

# **A STUDY ON THE CRYSTAL STRUCTURE OF BIOLOGICALLY IMPORTANT MOLECULES**

**Dissertation Submitted for the Degree of  
Doctor of Philosophy (Science)  
of the  
University of Calcutta**

*By*

**JIBAN KANTI DATTA GUPTA

<u>PREFACE</u>	..	..	..	1
<u>ACKNOWLEDGEMENTS</u>	..	..	..	2
<u>CHAPTER I</u> :	Introduction	..	..	5
<u>CHAPTER II</u> :	Experimental as well as theoretical aspects of various methods usually employed for the determination of crystal and molecular structure	..	..	12
<u>CHAPTER III</u> :	<u>Structure determination of p-dimethylaminobenzaldehyde hydrobromide</u>			
	Preparation of the compound and growth of single crystals	..	..	49
	Cell dimensions and space group	..	..	49
	2-D analysis	..	..	52
	A) Data reduction	..	..	53
	B) Location of heavy atom	..	..	56
	C) Analysis of the structure by minimum function plot and Fourier synthesis	..	..	60
	3-D analysis	..	..	62
<u>CHAPTER IV</u> :	Refinement of the structure of p-dimethylaminobenzaldehyde hydrobromide	..	..	68
	Bond lengths and angles and their standard deviations	..	..	73

<u>CHAPTER V</u>	:	Discussion on the structure of p-dimethylaminobenzaldehyde hydrobromide ..	..	76
		Intramolecular features ..	..	77
		Intermolecular features ..	..	85
		Tables (Nos. 1 to 9) ..	..	88
<u>CHAPTER VI</u>	:	<u>Determination and refinement of the structure of piperidine hydrochloride</u>		
		Preparation of the compound and growth of single crystals ..	..	115
		Cell dimensions and space group ..	..	116
		2-D analysis ..	..	120
		3-D analysis ..	..	123
		Refinement of the structure ..	..	129
<u>CHAPTER VII</u>	:	Discussion on the structure of piperidine hydrochloride ..	..	133
		Tables (Nos. 12 to 19) ..	..	140
<u>CHAPTER VIII</u>	:	Summary ..	..	162
		References ..	..	168
