PART I

Chapter I: An Introduction to Papain family of Cysteine Proteases

1.1	Proteases	03
1.1.1	<i>Classification of proteases</i>	03
	A. <i>Classification on the basis of reaction catalyzed by the proteases</i>	03
	B. <i>Classification on the basis of catalytic mechanism</i>	03
	C. <i>Classification on the basis of evolutionary relationship</i>	04
1.2	Cysteine proteases	04
1.2.1	<i>Classification of cysteine proteases</i>	05
1.3	Papain family (clan CA, family C1)	06
1.4	Overall structure of papain-like cysteine proteases	08
1.5	The pro region of papain-like cysteine proteases	10
1.5.1	<i>The role of N-terminal pro region:</i>	13
	A. <i>In protein folding</i>	13
	B. <i>Inhibitory role</i>	14
1.6	Catalytic mechanism of papain-like cysteine proteases	15
1.7	Structural requirements for the catalytic efficiency	15

1.8	Substrate Specificity of papain-like cysteine proteases	20
1.8.1	<i>Subsites</i>	21
A.	<i>Nonprimed subsites</i>	23
B.	<i>Primed subsites</i>	26
1.9	Inhibitors of papain-like cysteine proteases	28
1.9.1	<i>Proteinaceous inhibitors</i>	28
A.	<i>Cystatins</i>	28
B.	<i>Thyropins</i>	30
C.	<i>Propeptide-like inhibitors</i>	30
1.9.2	<i>Low molecular weight nonpeptide inhibitors</i>	31
1.10	Scope and objective of the present study	31
	<u>Chapter II: Characterization of Ervatamins</u>	34
2.1	Ervatamins	36
2.2	Materials and methods	37
2.2.1	<i>Purification of ervatamins</i>	37
2.2.2	<i>Cloning and partial cDNA sequencing of ervatamins</i>	40
A.	<i>RNA isolation and RT-PCR</i>	40
B.	<i>PCR amplification of mature ervatamin-A cDNA</i>	40
C.	<i>PCR amplification of mature ervatamin-B cDNA</i>	41
D.	<i>PCR amplification of mature ervatamin-C cDNA</i>	41
E.	<i>Cloning and sequencing</i>	42
2.2.3	<i>Specific activity</i>	43
2.2.4	<i>Kinetic studies of ervatamins</i>	44
2.2.5	<i>Active-site titration with E-64</i>	48
2.2.6	<i>Circular dichroism (CD) spectroscopy</i>	48
2.3	Results and discussion	50
2.3.1	<i>Partial cDNA sequence of ervatamin-A and ervatamin-C</i>	50

2.3.2	<i>Specific activity</i>	52
2.3.3	<i>Substrate specificity</i>	52
2.3.4	<i>Inhibition studies of ervatamins</i>	54
2.3.5	<i>CD spectroscopy</i>	56
	A. <i>Analysis of the far-UV CD spectra</i>	56
	B. <i>Thermal denaturation of ervatamins</i>	57

Chapter III: Crystallographic Studies of Ervatamin-A and -C complexed with E-64

3.1	Introduction	62
3.2	Materials and methods	62
	3.2.1 <i>Enzyme-inhibitor complex formation</i>	62
	3.2.2 <i>Crystallization of enzyme-inhibitor complexes</i>	62
	3.2.3 <i>Data collection</i>	64
	3.2.4 <i>Structure solution and refinement of ervatamin-A-E-64 complex</i>	67
	3.2.5 <i>Structure solution and refinement of ervatamin-C-E-64 complex</i>	70
3.3	Twinning: an Introduction	73
	3.3.1 <i>Classification of twinning</i>	74
3.4	Results and discussion	76
	3.4.1 <i>Detection of twinning in ervatamin-A-E-64 data</i>	76
	A. <i>Indexing</i>	76
	B. <i>Testing for perfect twinning</i>	76
	C. <i>Inspection of diffraction patterns</i>	78
	D. <i>Packing density consideration</i>	78
	E. <i>Cumulative intensity distribution</i>	79
	F. <i>L-test</i>	80
	G. <i>Unit cell</i>	81
	H. <i>Analysis of self-rotation function</i>	82
	3.4.2 <i>Determination of the twin law and twin fraction</i>	82

A. <i>H</i> -test	83
B. Britton plot	85
3.4.3 <i>Quality of the final model</i>	87
A. <i>Ervatamin-A-E-64</i>	87
B. <i>Ervatamin-C-E-64</i>	88
3.4.4 <i>Overall organization of ervatamin-A</i>	88
3.4.5 <i>Comparative analysis of ervatamin-A structure</i>	90
3.4.6 <i>E-64 binding sites in ervatamin-A and ervatamin-C</i>	92
A. <i>S2-P2 interactions</i>	94
B. <i>S3-P3 interactions</i>	96

Chapter IV: Structural Insights into Activity and Specificity of Ervatamins

4.1 Introduction	99
4.2 Specificity of ervatamins	100
4.3 High activity of ervatamin-A	104
4.4 Conclusion	108

Chapter V: Cloning and Sequencing of preproervatamin-C

5.1 Introduction	111
5.1.1 <i>Rapid amplification of cDNA ends (RACE)</i>	112
5.2 Cloning and Sequencing	116
5.2.1 <i>RNA isolation and RT-PCR</i>	116
5.2.2 <i>RLM-RACE cDNA synthesis</i>	116
5.2.3 <i>Cloning and sequencing of ervatamin-C zymogen</i>	118
5.2.4 <i>Sequence data analysis</i>	118

5.2.5	<i>Subcloning in expression vector</i>	119
5.2.6	<i>Homology modeling</i>	120
5.3	Results and discussion	122

PART II

Chapter VI: Thaumatin-like Proteins: an Overview 130

6.1	Pathogenesis related (PR) proteins	132
6.2	The PR- 5 family: TLPs and OLPs	134
6.3	Physicochemical properties of TLPs	136
6.4	Biological functions of TLPs	138
6.4.1	<i>Antifungal activity</i>	138
6.4.2	<i>β-1,3-glucanase activity</i>	139
6.4.3	<i>Antifreeze activity</i>	140
6.4.4	<i>Ripening and developmental role</i>	141
6.4.5	<i>Allergenicity</i>	141
6.5	Scope and objectives of the present study	142

Chapter VII: Purification and Crystallographic Studies on NP24-I

7.1	Materials and methods	147
7.1.1	<i>Purification</i>	147
7.1.2	<i>Crystallization</i>	149
7.1.3	<i>Data collection and processing</i>	150

7.1.4	<i>Structure solution and refinement</i>	152
7.1.5	<i>Docking of a 1,3-β-D-glucan molecule</i>	154
7.2	Results and discussion	155
7.2.1	<i>Quality of the final model</i>	155
7.2.2	<i>Overall structure</i>	157
7.2.3	<i>Cleft region</i>	159
7.2.4	<i>Antifungal and β-1,3-glucanase activity</i>	161
7.2.5	<i>Prediction of allergenicity</i>	165
7.3	Conclusion	167
	<i>Bibliography</i>	<i>R.1-R.22</i>
	<i>List of Publications</i>	<i>P.1</i>
