

NONPERTURBATIVE STUDIES OF QUANTUM FIELD THEORIES ON SPACE-TIME LATTICE

A Thesis Submitted To

JADAVPUR UNIVERSITY

Kolkata, India

For the Degree of

Doctor of Philosophy (Science)

By

JYOTIRMOY MAITI

Theory Division

Saha Institute of Nuclear Physics

1/AF Bidhannagar, Kolkata, India

2008

TABLE OF CONTENTS

	Page
List of Figures	vi
List of Tables	x
Chapters:	
1. Introduction	1
1.1 Introduction to lattice	3
1.2 Gauge fields on lattice	5
1.2.1 Abelian gauge fields on lattice	8
1.2.2 Nonabelian gauge fields on lattice	11
1.3 Fermions on lattice	12
1.3.1 Wilson fermion	16
1.3.2 Other lattice fermions	17
1.4 Transfer matrix	18
1.5 Reflection Positivity	20
1.6 Continuum Limit	22
1.7 Lattice QCD and its continuum limit	25
1.8 The goal of this work	28
2. Lattice QCD on Computer and Continuum Physics from it	31
2.1 HMC algorithm	34
2.2 Pre-conditioning the Wilson-Dirac matrix	38
2.3 Eigen value spectrum of W-D operator and exceptional configurations	39
2.4 Interpolating Field Operators	41
2.5 Computation of correlation functions and their large time behavior	42
2.6 Broken Chiral symmetry on lattice	43
2.7 Extracting Continuum Physics from Lattice Results	49
2.7.1 Chiral Perturbation Theory	49
2.7.2 Possible cut-off effects/Approach to continuum limit	52
2.7.3 Finite size effects	54

3.	Lattice QCD with Wilson fermions using Gaussian Smearing	58
3.1	Details of Simulation	61
3.2	Auto correlation	62
3.3	Extraction of mesonic quantities and quark mass	64
3.3.1	Pion Decay Constant	65
3.3.2	PCAC Quark Mass	66
3.3.3	Rho Mass and Decay Constant	67
3.4	Fitting the propagator	67
3.5	Smearing of quark fields	70
3.6	Details of the implementation of the Gaussian smearing	72
3.7	Results for the pion: am_π , aF_π and am_q	82
3.7.1	Chiral behavior	88
3.7.2	Comparison of VWI and AWI masses	91
3.8	Results for the Rho: am_ρ , aF_ρ and different ratios	96
4.	On Scale Determination in Lattice QCD with Dynamical Quarks	99
4.1	Extraction of the Static Potential from Wilson loops	102
4.2	Fit of the Static Potential	105
4.3	Sommer Scale	116
4.4	Dependence on am_q	116
4.5	Interpretation of the am_q dependence of a/r_c	122
4.6	Chiral extrapolation	125
4.7	Estimate of $\sigma^{1/2}$	133
4.8	Implications from weak coupling perturbation theory	135
4.8.1	Static source self energy	135
4.8.2	Extraction of the strong coupling constant from the plaquette	136
5.	Conclusions and Outlook	138
Appendices:		
A.	Gauge fixing on lattice	144
B.	Trick of Fast Fourier Transform for sink smearing	147
C.	Jackknife estimate of errors	150
	Bibliography	152
