

**NMR INVESTIGATION OF TRANSITION
METAL AND RARE-EARTH COMPOUNDS**

THESIS SUBMITTED FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY (SCIENCE)
OF THE
UNIVERSITY OF CALCUTTA

BY
AMITABHA GHOSHRAY
SAHA INSTITUTE OF NUCLEAR PHYSICS
CALCUTTA-9
JULY-1981

C O N T E N T S

CHAPTER I : Introduction

1.1	Hyperfine Interaction	2
1.1.1	Magnetic Hyperfine Interaction	3
1.1.2	Nuclear Quadrupolar Interaction	4
1.1.2.1	Matrix Elements of the Quadrupole Hamiltonian	7
1.1.2.2	Description of Electric Field Gradient	8
1.2	Investigation of Hyperfine Interaction by NMR	9
1.3	NMR Studies of Paramagnetic Compounds	11
1.3.1	Covalency Effects and Ligand Hyperfine Interaction	14
1.3.2	Hyperfine Interaction through Super Exchange Linkages	15
1.3.3	NMR in 3d Systems	16
1.3.4	NMR in 4f Systems	18
1.3.5	The Ligand Nucleus Quadrupole Interaction	20
1.4	NMR Investigations of Phase Transition	23
1.4.1	Introduction	23
1.4.2	Structural Phase Transition	23
1.4.3	Phase Transition Study by NMR	29
1.4.3.1	Phase Transition in Perovskite Type Crystals	29
1.4.3.2	Phase Transition in some H-Bonded Crystals	32
A)	Deuteron Resonance in KD_2PO_4 Type Crystals	33
B)	^{75}As Resonance in KH_2AsO_4 and KD_2AsO_4	35

	<u>Page</u>
<u>CHAPTER II</u> : Experimental	
2.1 Preparation and Analysis of Samples ..	38
2.1.1 Polycrystalline Rare Earth Cobaltites ..	38
2.1.2 Preparation of $\text{CoSiF}_6 \cdot x\text{D}_2\text{O} \cdot (6-x)\text{H}_2\text{O}$ Single Crystals ..	39
2.2 NMR Spectrometer and Accessories ..	40
2.2.1 Modification in Magnet Power Supply Unit V-2100B ..	40
2.2.2 Temperature Variation Accessories ..	41
2.3 Field Scanning	42
2.4 Calibration Procedure	42
2.5 Fabrication of Goniometer for Single Crystal NMR Study	43
2.6 NMR shifts	44
2.6.1 Measurement of the shifts	45
 <u>CHAPTER III</u> : Deuteron Magnetic Resonance Study of $\text{CoSiF}_6 \cdot 6\text{D}_2\text{O}$	
3.1 Introduction	48
3.1.1 NMR Studies of $\text{M}^{2+}\text{SiF}_6 \cdot 6\text{H}_2\text{O}$..	51
3.2 Energy Levels in Case of Quadrupolar Nuclei ..	54
3.2.1 Strength of Quadrupolar Interaction ..	55
3.2.2 Calculations of Energy Levels and Frequencies in First Order and Second Order ..	56
3.2.3 Orientation Dependence of Frequencies ..	58

	<u>Page</u>
3.3 Analysis of NMR Rotation Pattern of Single Crystal in Presence of Quadrupolar Interaction	
3.3.1 Introduction	59
3.3.2 Symmetry and Structural Considerations ..	62
3.3.3 Rotation Pattern Analysis by the Volkoff Method (Volkoff et al. 1952) ..	63
3.4 ²D NMR Studies of CoSiF₆.6D₂O ..	66
3.4.1 Crystal Structure of CoSiF ₆ .6D ₂ O ..	66
3.4.2 Analysis of ² D NMR in CoSiF ₆ .6D ₂ O Single Crystal at 300 K ..	68
3.4.3 On the Flip Motion of Water Molecules ..	74
3.4.4 Determination of the Positional Coordinates of the Hydrogen Atoms ..	76
3.4.5 Temperature Variation Study of CoSiF ₆ .6H ₂ O and CoSiF ₆ .6D ₂ O ..	80
3.4.5.1 Introduction	80
3.4.5.2 Temperature Variation Study of ¹ H NMR in CoSiF ₆ .6H ₂ O Single Crystal ..	81
3.4.5.3 Temperature Variation Study of ² D NMR in CoSiF ₆ .6D ₂ O Crystal ..	82
3.4.5.4 On the Role of Water Molecules on the Phase Transition	85

CHAPTER IV : NMR Investigation in Rare Earth Cobaltites

4.1 Introduction	90
4.1.1 Spin State Transition in Solids ..	90
4.1.2 Electronic and Magnetic Properties of Rare Earth Cobaltites	92

	<u>Page</u>
4.1.2.1 Introduction	92
4.1.2.2 Physical Properties of ABO_3 Perovskites	93
4.1.2.3 Electronic Structure of MX_6 Complexes ..	95
4.1.2.4 Crystal Field Versus Exchange Interaction	100
4.1.3 Experimental Studies on Rare Earth Cobaltites	103
4.1.4 ^{59}Co NMR Studies of LnCoO_3 Systems ..	113
4.2 Shifts of Nuclear Energy Level due to Magnetic Hyperfine Interaction	116
4.2.1 Magnetic Hyperfine Interaction ..	116
4.2.1.1 Isotropic Hyperfine Interaction ..	117
4.2.1.2 Anisotropic Hyperfine Interaction ..	119
4.2.2 Local Field Contribution to the shift ..	120
4.2.3 Dipolar (Pseudo Contact) shift ..	121
4.2.4 Temperature Independent Paramagnetic Shift	122
4.2.4.1 Calculation of the Second Order Chemical Shift	123
4.2.4.2 Temperature Independent Shift in Cobaltic Complexes	126
4.3 Analysis of Powder Spectra in Presence of Hyperfine Interaction	129
4.3.1 Powder Pattern	129
4.3.2 Intensity Distributions and Characteristic Features in Powder Pattern	129
4.3.2.1 Effect of Line Broadening in Powder Spectra	131
4.3.3 Combined Nuclear Quadrupole and Magnetic Hyperfine Interaction Effects in Powder Spectra	132

	<u>Page</u>
4.3.3.1 Powder Pattern in First Order ..	135
4.3.3.2 Powder Pattern in Second Order ..	137
4.3.4 Analysis of Powder Spectra ..	143
4.3.4.1 Method of Baugher et al. (Baugher et al. 1969) ($\eta \neq 0$) ; Parameters from Central Transition ..	143
4.3.4.2 Method of Jones et al. (Jones et al. 1963) ($\eta = 0$) ; Parameters from Central Transition ..	145
4.4 Results of the NMR Investigation in Polycrystalline Rare Earth Cobaltites (LnCoO_3 , Ln = Rare Earths) ..	147
4.4.1 Introduction ..	147
4.4.2 Central Transition of ^{59}Co NMR in Paramagnetic LnCoO_3 ..	149
4.4.2.1 Powder ^{spectra} of ^{59}Co NMR in LnCoO_3 ..	149
A) First Group ..	152
B) Second Group (i) Line Shape with $\eta = 0$ and (ii) Line Shape with $\eta \neq 0$..	152
C) Third Group ..	156
4.4.2.2 Magnetic Shift and Quadrupolar Interaction Parameters ..	159
4.4.2.3 The Line Width of the Central Transition ..	168
4.4.2.4 Temperature Variation Study of Hyperfine Interaction Parameters in LnCoO_3 ..	174
4.4.2.4.1 Separation of Temperature Dependent Shift from Total Shift ..	174
4.4.2.4.2 The Variation of Quadrupolar Interaction Parameter with Temperature ..	180

	<u>Page</u>
4.4.3 Satellite Transition of ^{59}Co NMR in YCoO ₃	183
4.4.4 Hyperfine Interaction Parameters and Spin State Transition in LnCoO ₃ ..	185
4.4.4.1 Shifts	186
4.4.4.2 Quadrupolar Interaction	188
