

Role of Epstein-Barr virus in self-renewal and oncogenesis

**Thesis submitted for the Degree of Doctor of Philosophy (Science)
of
Jadavpur University
2010**

**Submitted by
Aditi Sengupta Banerjee
Structural Genomics Division,
Saha Institute of Nuclear Physics,
1/AF, Bidhannagar, Kolkata-700064
INDIA**

Contents

	Page No.
Chapter 1	
INTRODUCTION	1
Chapter 2	
SCIENTIFIC BACKGROUND	
Epstein-Barr Virus	12
EBV and Cancer	17
Gastric cancer and EBV	20
EBV and Self-renewal	26
Chapter 3	
MATERIALS AND METHODS	
3.1. Chemicals	32
3.2. Cell Culture	32
3.3. DNA constructs and transfection	33
3.4. RT-PCR & Quantitative RT-PCR	33
3.5. Western Blot Analysis	37
3.6. Determination of intracellular ROS generation	37
3.7. Invasion assay	38
3.8. MTT Assay	39
3.9. Cell cycle analysis	39
3.10. RIG-1 knockdown using small interfering RNAs	40
3.11. Enzyme-Linked Immunosorbent Assay	40
3.12. Activated tyrosine kinase arrays	40
3.13. Statistical analysis	41
Chapter 4	
RESULTS	
4.1. Ectopic expression of LMP2A and EBERs in EBV non-associated epithelial cell lines	43
4.2. Effect of LMP2A on self-renewal pathways	
4.2.1. LMP2A constitutively activates Notch pathway	45
4.2.2. LMP2A activates Wnt/ β -Catenin pathway	47
4.2.3. LMP2A deregulates Shh pathway	49

4.3. LMP2A functions through Notch activation in gastric cancer cells	
4.3.1. LMP2A upregulates transcriptional expression of Cyr61 and N-cadherin in AGS cells	51
4.3.2. LMP2A activates Akt pathway along with downregulating PTEN and TSC-2	52
4.3.3. LMP2A upregulates HIF-1α and Twist expression	53
4.4. Notch activation promotes cellular migration of LMP2A-expressing gastric cancer cells	54
4.5. Effect of EBERs on self-renewal pathways	55
4.6. EBERs not involved in PTEN, TSC-2 and HIF-1α regulation	56
4.7. EBERs lead to chemoresistance in epithelial cancer cells	57
4.8. EBERs downregulate the expression of p21 and p27	59
4.9. EBERs promote upregulation of IL-6 expression	61
4.10. EBERs upregulate the expression of IL-6 target genes	63
4.11. EBERs induce IL-6 mediated STAT3 activation	65
4.12. Activated STAT3 regulates chemoresistance in EBERs-expressing gastric cancer cells	67
4.13. EBERs activate receptor tyrosine kinases, EphA2 and ErbB2	70
4.14. EBERs mediated STAT3 activation induce invasiveness of gastric cancer cells	72
Chapter 5	
DISCUSSION	75
Chapter 6
