# INTERFACIAL INSTABILITY DRIVEN GROWTH OF LOW DIMENSIONAL STRUCTURES

---

Thesis submitted to  
JADAVPUR UNIVERSITY  
for the degree of  
DOCTOR OF PHILOSOPHY (SCIENCE)

by

JAYANTA KR. BAL

Surface Physics Division  
Saha Institute of Nuclear Physics  
Kolkata, India  
December, 2010

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Motivation or driving force . . . . .	3
1.1.1	Technological driving force . . . . .	3
1.1.2	Scientific driving force . . . . .	5
1.2	Goal of the thesis . . . . .	7
1.3	Outline of the thesis . . . . .	8
<b>2</b>	<b>Nanolayer on semiconductor: A review</b>	<b>10</b>
2.1	Introduction . . . . .	10
2.2	Substrate surface . . . . .	13
2.2.1	Si surface: Native oxide . . . . .	13
2.2.2	Si surface: Etching . . . . .	17
2.2.3	Si surface: Cleaning . . . . .	19
2.2.4	Si surface: Passivation . . . . .	20
2.3	Metal/Si . . . . .	23
2.3.1	Interface formation mechanism . . . . .	23
2.3.2	Atomic diffusion mechanism . . . . .	26
2.3.3	Au/Si system . . . . .	29
2.3.4	Ag/Si system . . . . .	31

## CONTENTS

---

2.3.5	Cu/Si system . . . . .	32
2.4	LB film/Si . . . . .	33
<b>3</b>	<b>Experimental details</b>	<b>37</b>
3.1	Sample preparation . . . . .	37
3.1.1	Substrate preparation . . . . .	37
3.1.2	Nanolayer deposition . . . . .	38
3.2	Characterization . . . . .	52
3.2.1	X-ray scattering . . . . .	53
3.2.2	Scanning probe microscopy . . . . .	62
3.2.3	Scanning electron microscopy . . . . .	73
<b>4</b>	<b>Au on passivated Si surface: Observation of interdiffusion</b>	<b>78</b>
4.1	Introduction . . . . .	78
4.2	Passivation and crystalline orientation dependent interdiffusion . . . . .	79
4.2.1	Results and discussion . . . . .	80
4.3	Driving force of room-temperature diffusion . . . . .	101
4.3.1	Results and discussion . . . . .	101
4.4	Interdiffused layer: Direct evidences . . . . .	110
4.4.1	Cross sectional SEM . . . . .	111
4.4.2	SIMS . . . . .	114
4.5	Conclusions . . . . .	114
<b>5</b>	<b>Ag on passivated Si surface: Observation of dewetting</b>	<b>117</b>
5.1	Introduction . . . . .	117
5.2	Results and discussion . . . . .	120
5.2.1	Growth and evolution at ambient condition . . . . .	120
5.2.2	Growth and evolution at UHV condition . . . . .	128
5.2.3	Role of passivation in wetting and dewetting . . . . .	130
5.3	Conclusions . . . . .	131

<b>6</b>	<b>Cu on passivated Si surface: Coexistence of interdiffusion and dewetting</b>	<b>133</b>
6.1	Introduction . . . . .	133
6.2	Results and discussion . . . . .	135
6.2.1	Electron density profile and its evolution . . . . .	135
6.2.2	Topography and its evolution . . . . .	137
6.2.3	Dewetting and Interdiffusion . . . . .	141
6.3	Conclusions . . . . .	143
 <b>7</b>	 <b>Langmuir-Blodgett film on passivated Si surface: Observation of hydrophilic and hydrophobic interaction</b>	 <b>145</b>
7.1	Introduction . . . . .	145
7.2	Passivation dependent growth . . . . .	146
7.2.1	Results and discussion . . . . .	147
7.3	Metal ion dependent growth . . . . .	160
7.3.1	Results and discussion . . . . .	160
7.4	Environment dependent growth . . . . .	171
7.4.1	Results and discussion . . . . .	174
7.5	Conclusions . . . . .	186
 <b>8</b>	 <b>Conclusions and outlook</b>	 <b>188</b>
8.1	Summary and concluding remarks . . . . .	188
8.1.1	Summary . . . . .	188
8.1.2	General conclusions . . . . .	192
8.2	Scope for further studies . . . . .	193
