ACKNOWLEDGEMENTS

I express my sincere gratitude to Dr. Subrata Banerjee, Professor, Biophysics and Structural Genomics Division, Saha Institute of Nuclear Physics for his valuable guidance and support throughout my Ph.D. training programme. I thankfully acknowledge Council of Scientific and Industrial Research, Government of India for providing me with research fellowship during the entire tenure of my research work. I gratefully acknowledge Dr. Bikas. K. Chakrabarti, Director, Saha institute of Nuclear Physics, Kolkata for providing me an opportunity to work in this institute. I am thankful to Dr. Nitai P. Bhattacharya, Dr. Abhijit Chakrabarti, Dr. Oishee Chakrabarti and Dr. Debhashis Mukhopadhyay for their valued comments, criticisms and suggestions.

I am deeply indebted to Prof. R. Longnecker (Northwestern University, Chicago), Prof. Alexander M. van der Blik (Department of Biological Chemistry, UCLA School of Medicine, Los Angeles, California), Dr. Apurva Sarin (National Centre for Biological Sciences, Bangalore, India) and Prof Kristian Helin (University of Copenhagen, Denmark) for sharing with us various laboratory constructs and reagents. This work would not have been possible without their help and cooperation.

I also take this opportunity to thank all the staff members of the Biophysics and Structural Genomics Division including Mr. Sanjay Shaw, Mr. Manik Barua, Mr. Raju Dutta, Mr. Madhusudan Shyamal, Ms. Mahua Dutta, Mr. Shymal Chandra Digar and Mr. Nirmal Das for their assistance and cooperation. I am grateful to Dr. Anita Roy, Nandini Pal Basak and Srijan

Halder for providing me with a helpful and positive work environment in the laboratory. I also enjoyed the company of Shilpita, Suchismita, Kasturi, Arunabha, Shounak, Avik, Madhurima, Devika, Priyanka, Rukmini, Debashree, Mohor, Piyali, and Zenia. I am thankful to all my colleagues, distinguished faculty members and staff members of Saha Institute of Nuclear Physics. I thank all my teachers who inspired me to pursue research. Last but not the least I am highly indebted to my family for standing by me in all good and bad times.

ANINDITA DEB

Contents

	Page No.
ABBREVIATIONS	1-3
Chapter 1	
INTRODUCTION	4-12
Chapter 2	
SCIENTIFIC BACKGROUND	13-44
Epstein-Barr Virus	14-18
EBV and Cancer	19-22
Gastric cancer and EBV	22-27
Self-renewal pathways and EBV	27-29
Mitochondria and Mitochondrial Dynamics	29-43
EBV oncoproteins and cell migration	43-44
Chapter 3	
MATERIALS AND METHODS	45-53
3.1. Materials	46-46
3.2. Cell Culture	46-46
3.3. DNA constructs and transfection	46-47
3.4. RT-PCR & Quantitative RT-PCR	47-49
3.5. Western Blot Analysis	49-50
3.6. RNA interference	50-50
3.7. Confocal Microscopy	50-51
3.8. Cell Invasion and Migration assay	51-52
3.9. Cell cycle analysis	52-52
3.10. MTT Assay	52-53
3.11. Statistical analysis	53-53
Chapter 4	
RESULTS	54-79
4.1. Ectopic expression of LMP2A and EBERs in EBV non-associated epithelial cell lines	55-55
4.2. Effect EBV latency 1 genes on cellular proliferation in gastric cancer cells	55-56
4.3. EBERs lead to chemoresistance in gastric cancer cells	57-58
4.4. LMP2A expression induces Epithelial Mesenchymal Transition and cell invasion	58-60
4.5. Effect of LMP2A and EBERs on self renewal pathways	61-62
4.6. LMP2A expression is associated with increased mitochondrial fission	63-66

4.7. Increase of Drp1 upon LMP2A overexpression is responsible for cell migration	66-68
4.8. LMP2A increases cell migration via the Notch pathway	68-70
4.9. LMP2A induced Notch pathway mediated migration is associated with Drp1 elevation	71-73
4.10. LMP2A expression is associated with activation of PI3K/Akt pathway in gastric cancer and breast cancer cells	73-74
4.11. LMP2A activated PI3K/Akt expression increases mitochondrial fission associated with Drp1 elevation	74-77
4.12. Inhibition of the PI3K/Akt pathway decreases Drp1 mediated cell invasion	78-80

Chapter 5 DISCUSSION	81-88
