

# **BIOLOGY OF MEGAKARYOCYTES**

Thesis submitted for the Degree of  
Doctor of Philosophy (Science)

In

Biochemistry

By

**SRIJAN HALDAR**

Department of Biochemistry  
University of Calcutta  
2015

# CONTENTS

	<b>Page No.</b>
<b>ABBREVIATIONS</b>	<b>1-2</b>
<b>Chapter 1</b>	
<b>INTRODUCTION</b>	<b>3-13</b>
<b>Chapter 2</b>	
<b>SCIENTIFIC BACKGROUND</b>	<b>14-37</b>
2.1 Haematopoiesis and Origin of megakaryocytes	
2.2 Megakaryopoiesis	
2.3 Cellular signalling during megakaryopoiesis	
2.4 Endomitosis	
2.5 Mechanism behind Endomitosis	
2.6 Cytoplasmic maturation of megakaryocytes	
2.7 DNA replication during megakaryopoiesis	
2.8 miRNA and its biogenesis	
2.9 miRNAs in hematopoietic differentiation	
2.10 Role of miRNA in megakaryopoiesis	
2.11. Microvesicles	
2.12. Platelet derived microvesicles	
<b>Chapter 3</b>	
<b>MATERIALS AND METHODS</b>	<b>38-48</b>
3.1 Isolation of CD34 <sup>+</sup> cells from cord blood/bone marrow	
3.2 Unilineage megakaryocyte culture	
3.3 Cell lines and culture conditions	
3.4 Microvesicles Isolation	
3.5 Cell cycle analysis	
3.6 Plasmid constructs	
3.7 Flow cytometric sorting	
3.8 Western blotting	
3.9 Confocal Microscopy	
3.10 Co- immunoprecipitation	
3.11 Dual- Luciferase Reporter assay	
3.12 Transmission Electron Microscopy	
3.13 Reagents	
3.14 RNA interference	

- 3.15 Dynamic light scattering
- 3.16 Statistical Analysis
- 3.17 RNA extraction and Real Time PCR

## **Chapter 4**

### **RESULTS**

49-91

- 4.1 Co-transcription of MCM7 and its intronic miR-106b-25 cluster during mitotic cell cycle of megakaryocytic cell lines
- 4.2 Megakaryocytic differentiation and polyploidy formation of HEL and CMK cell lines
- 4.3 Differential expression of MCM2, MCM6, and MCM7 and its intronic miRNA cluster during endomitosis
- 4.4 Localisation of MCM7 and its promoter expression during megakaryocytic differentiation
- 4.5 Up regulation of miR-106b-25 cluster megakaryopoiesis specific phenomena
- 4.6 Differential expression of MCM7 and its intronic miRNA cluster in *in vitro* primary megakaryopoiesis
- 4.7 Nonsense mediated decay of MCM7 transcript variant during megakaryopoiesis
- 4.8 Inhibition of Nonsense mediated decay up regulates accumulation of MCM7 during endomitosis.
- 4.9 miR-25 promotes megakaryopoiesis
- 4.10 miR-25 induced changes in megakaryopoiesis were modulated by down regulation of PTEN
- 4.11 Microvesicle production from megakaryocytic cells.
- 4.12 Microvesicle treatment induces differentiation in recipient cells
- 4.13 Effects of microvesicles on primary megakaryocytic culture and on monocytic cell line Thp1
- 4.14 Involvement of CXCR4 in megakaryocytic lineage induction
- 4.15 miRNAs in megakaryocyte derived MVs
