

**STRUCTURE, DYNAMICS AND
INTERACTION OF NUCLEIC ACIDS:
THEORETICAL COMPUTATIONAL
ANALYSIS**

**Thesis submitted for the degree of
Doctor of Philosophy (Science)
in
Biophysics, Molecular Biology and Genetics**

**by
MANAS MONDAL**

**Department of Biophysics, Molecular Biology and
Bioinformatics
University of Calcutta
2015**

Table of Contents:

CHAPTER	PAGE NUMBER
CHAPTER 1	1 - 88
<i>Section I: Introduction to Nucleic Acids & Protein</i>	1-62
<i>Section II: Introduction to Biomolecular Recognition & Protein-DNA Interaction</i>	63-88
AIMS AND SCOPE OF THE PRESENT STUDY	89 – 91
CHAPTER 2	92 –127
<i>Study of Stacking Interaction by Monte Carlo Simulation</i>	
CHAPTER 3	128 - 156
<i>RNA Structure & G:U Wobble Base pair</i>	
CHAPTER 4	157 - 194
<i>TATA Box & Conformational Selection</i>	
CHAPTER 5	195 - 215
<i>Contribution of Phenyl Alanine Side chain Intercalation in TBP-DNA Interaction</i>	
CHAPTER 6	216 - 249
<i>DNA Sequence Mediated Allosteric Effect in Lambda repressor-DNA Interaction</i>	
GENERAL DISCUSSION	250 - 256
<i>Conclusion</i>	
<i>Scope of Future Work</i>	
REFERENCES	257-297
APPENDICES	298-321
PUBLICATIONS & PROCEEDINGS	322-326
