

**p21 Activated Kinase and Small GTPase  
Signaling in *Entamoeba histolytica***

**THESIS SUBMITTED TO JADAVPUR UNIVERSITY FOR THE  
DEGREE OF DOCTOR OF PHILOSOPHY (SCIENCE) 2009**

**SUMAN DUTTA**

**Crystallography & Molecular Biology Division  
Saha Institute of Nuclear Physics  
1/AF Bidhannagar, Kolkata 700064.**

# CONTENTS

Topic	Page No.
<b>Introduction</b>	
<i>Entamoeba histolytica</i> – an overview	1
Life cycle of <i>Entamoeba histolytica</i>	2
Pathogenesis	3
The cytoskeleton components	6
Signal transduction	9
p21 Activated kinases (PAKs)	11
The PAK superfamily	19
The Pleckstrin homology (PH) superfold	21
References to introduction	27
<b>Aims and objectives</b>	41
<b>Materials and methods</b>	43
References to materials and methods	60
<b>Results and discussion</b>	
Sequence Analysis	62
Phylogenetic analysis	67
Protein Purification and antibody generation	70
Kinase activity of EhPAK3	72
Endogenous localisation of EhPAK3	75
Effect of heat shock	77
Lipid binding specificities of EhPAK3	80
Discussion	86
References to results and discussion	92
<b>Publications and presentations</b>	97
