CONTENTS

CHAPTER I: Introduction to Photoinduced Electron Transfer	1-68
1.1 The beginning: a historical perspective of electron transfer reactions	2
1.2 Theory of electron transfer reactions	4
1.2.1 The classical Marcus theory	4
1.2.2 Quantum mechanical aspects	10
1.2.3 Ultrafast electron transfer: contribution of solvation and vibrational dynamics	12
1.2.4 Beyond the Marcus theory..... (Intersecting State Model)	13
1.2.5 Distance dependence of electron transfer	15
1.2.6 The elusive Marcus inverted region	16
1.3 PET : Rehm Weller approach	18
1.4 Intermediates in PET	21
1.5 Intramolecular PET	25
1.6 PET in organized systems	26
1.7 PET in biology	28
1.8 Magnetic field (MF) effects on PET	32
1.8.1 S and T RIPs	33
1.8.2 S-T intersystem crossing (ISC) and mechanism of MF effect	35
1.8.3 The parameter $B_{1/2}$	39
1.8.4 MF effect on PET with S precursors	42
1.8.5 MF effect on PET with T precursors	48
1.8.6 MF effect on PET in Biology	54
References	56
CHAPTER II: Scope of the Thesis	69-72

CHAPTER III: Experimental Techniques

73-84

3.1 Absorption spectra	73
3.2 Fluorescence spectra	73
3.3 Fluorescence Lifetime Measurement	73
3.4 Measurement of MF effect on exciplex luminescence	76
3.5 Laser flash photolysis	78
3.6 MF effect on triplet non-fluorescent species	79
3.7 Materials	80
3.8 Preparation of micelles and reverse micelles	82
3.9 Preparation of small unilamellar vesicles (SUVs)	82
References	84

CHAPTER IV: A New Exciplex System Between Phenazine and Some Aromatic Amines: Dependence of Nature of Complexation on Structure of the Amine

85-101

4.1 Introduction	85
4.2 Results and Discussion	87
4.3 Conclusion	99
References	100

CHAPTER V: Relation Between Structure of Participating Molecules and PET Dynamics Revealed by MF Studies

102-118

5.1 Introduction	102
5.2 Results and Discussion	105
5.3 Conclusion	116
References	117

CHAPTER VI: Role of Solvent Geometry in PET Reactions **119-127**

6.1 Introduction	119
6.2 Results and Discussion	121
6.3 Conclusion	126
References	127

CHAPTER VII: Exploring the MF Effect on PET for the PZ-Amine Systems in Organized Assemblies

128-152

7.1 Introduction	128
7.2 Results and Discussion	131
7.2.1 MF effect in SDS micelles	131
7.2.2 MF effect in reverse micelles	140
7.2.3 MF effect in SUVs	145
7.2.4 MF effect in micelles, reverse micelles and SUVs: a comparison	148

7.3 Conclusion	150
References	151
CHAPTER VIII: PET in Some Model Biomolecules	153-178
8.1 Introduction	153
8.2 Interaction of PZ with water and DNA bases	153
8.2.1 Results and Discussion	154
8.3 Interaction of 4NQO with indole derivatives and some related biomolecules	163
8.3.1 Results and Discussion	164
8.4 Conclusion	174
References	176
CONCLUDING REMARKS	179-180
LIST OF ABBREVIATIONS	181-183
LIST OF PUBLICATIONS	184-185
